

Guerrilla RF Announces Completion of \$900,000 Series C Funding Round

Capital to Accelerate Revenue Growth and Mass Production of New Products

GREENSBORO, N.C. – August 25, 2016 – Guerrilla RF Inc., a leading provider of high performance microchips for wireless network infrastructure, today announces the closing of a \$900,000 Series C funding round with participation from multiple angel investors.

“We are excited about the dramatic revenue growth we are seeing this year,” said Ryan Pratt, founder and CEO at Guerrilla RF. “With production ramps occurring at multiple customers and many additional new design wins, we have enormous opportunities in front of us. With this funding, we can accelerate our revenue growth by expanding our product offerings and stepping up our marketing efforts.”

According to Research and Markets, the overall wireless network infrastructure market will see tremendous growth over the coming years. Growing at a compound annual growth rate of over 5 percent, the market will account for over \$104 billion in annual spending by the end of 2020.

About Guerrilla RF

Guerrilla RF provides high performance monolithic microwave integrated circuits (MMICs) to wireless infrastructure original equipment manufacturers in multiple market segments, including enterprise/carrier-class WiFi access points, small cells, wireless backhaul and cellular repeaters. The company’s patented Guerrilla Armor™ technology enables greater coverage area and higher data rates for wireless networks. Headquartered in Greensboro, N.C., the company was founded in April 2013 by Ryan Pratt. To date it has raised \$5 million in funding and introduced over 50 products. All trademarks are the property of their respective owners. For more information please visit <http://guerrilla-rf.com> or follow the company on [LinkedIn](#).
