Guerrilla RF Recommended for ISO 9001:2015 Certification

GREENSBORO, N.C. – September 25, 2017 – Guerrilla RF, Inc., rapidly becoming known around the world as the leader in high performance microchips for wireless RF and Microwave IC's, today announces the company has been recommended for ISO 9001:2015 certification by TUV Rheinland of North America, a third-party registrar.

"We are extremely proud our team has achieved this important milestone," said Steven Smith, Vice President of Quality at Guerrilla RF. "Guerrilla RF's accomplishment serves as validation to our customers that quality is not just a concept, but a reality they can count on. Achieving ISO 9001:2015 illustrates our commitment as a company to customer satisfaction and strengthened performance through continual process improvement."

As part of the ISO certification process, Guerrilla RF underwent a rigorous audit of its business and management processes, including the design, operations and sales processes. This achievement is another step forward and further confirms Guerrilla RF as a major supplier in the design and sale of high performance Radio Frequency Integrated Circuits (RFIC's) and Monolithic Microwave Integrated Circuits (MMIC's) for consumer, commercial and military wireless product applications.

About Guerrilla RF
Guerrilla RF provides high performance monolithic microwave integrated circuits (MMICs) to wireless infrastructure original equipment manufacturers in multiple market segments, including enterprise/carrier-class WiFi access points, small cells, wireless backhaul, cellular repeaters and automotive. The company's patented Guerrilla Armor™ technology enables greater coverage area and higher data rates for wireless networks. Headquartered in Greensboro, N.C., the company was founded in April 2013 by Ryan Pratt. To date it has introduced over 50 products. All trademarks are the property of their respective owners.

About ISO9001
ISO9001:2015 provides a tried-and-tested, process-based framework for taking a systematic approach to managing an organization's processes to enable consistent delivery of products that satisfy customers' expectations. The framework is used in over 190 countries by businesses and organizations large and small, in public and private sectors, by manufacturers and service providers, in all sectors of activity.

ISO 9001:2015 is the most relevant certification to date, replacing the prior ISO 9001:2008 standard.
